

Launching in France

Screen-Free Intelligence

The smartest thing in the room is also the softest. A cuddly plush companion that blends conversational AI, animated LED personality, and 40+ language learning—without screens or subscriptions.

The Compromise Triangle

A Conversational Friend

An AI-powered, screen-free companion designed for children aged 3-12. It talks, listens, and adapts to your child's developmental stage in real-time.

40+ Languages

Native-quality pronunciation from French to Arabic. A true multilingual tutor that makes language discovery feel like effortless play.

Animated Personality

No screens. Just expressive LED eyes that shift shapes—crescents for happy, wide ovals for listening, thin lines for sleeping—syncing perfectly with its mood.

Zero Subscriptions

One price. Every feature. Forever. Your child's data is never monetized, and your wallet is never drained.

Anatomy of a Best Friend

Hypoallergenic Brushed Cotton Fur.

Certified child-safe (JetBrains EN71 + ASTM F963). Tactile, durable, and safe to hug every single night.

The 'Emotion Engine'.

Sealed, rounded LED components that project a warm glow, providing vital emotional intelligence and empathy cues without a screen.

Persistent Memory Core.

The AI remembers your child's favorite topics, stories, and vocabulary, deepening the friendship over months instead of weeks.

Hidden USB-C Dock.

Parent-friendly charging tucked safely away, providing a seamless transition from playtime to downtime.

A Companion That Grows With Them

8:30 AM

Morning - Playful Curiosity

"Why is the sky blue?" ZackAI answers endless chains of "why" with endless patience, turning breakfast into a science exploration tailored to a 4-year-old's comprehension.

3:15 PM

Afternoon - Multilingual Immersion

Switching effortlessly from French to English after school. ZackAI doesn't run flashcard drills; it holds natural, joyful conversations to build true fluency.

7:45 PM

Night - Screen-Free Decompression

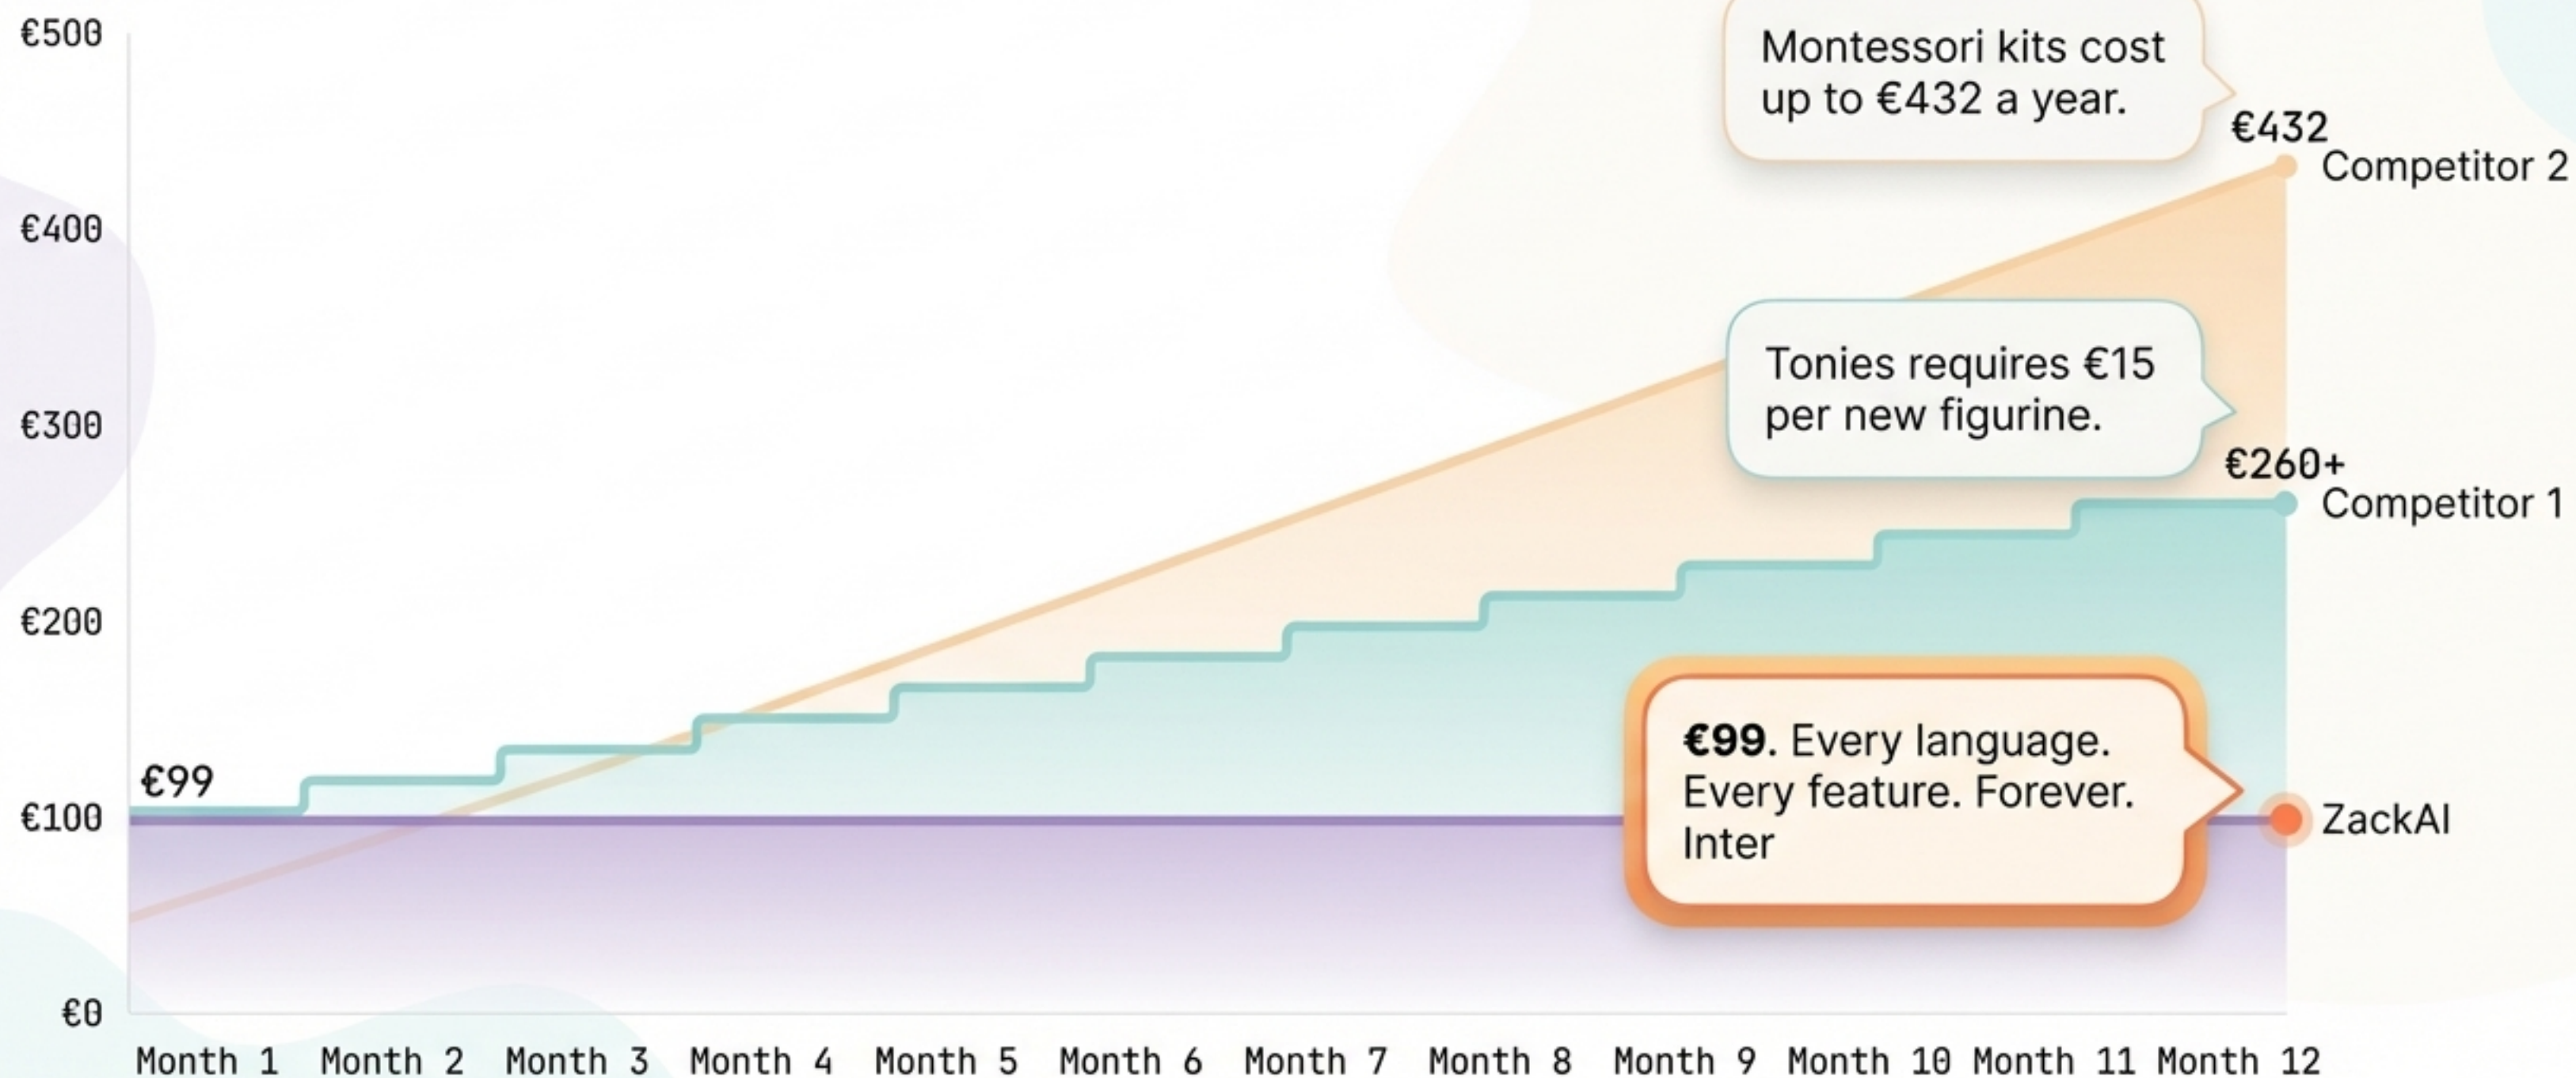

The bedtime warzone ends. Eyes dim to soft glowing lines as ZackAI narrates a personalized, calming story where your child is the hero, building a peaceful sleep ritual.

The only one listening is the fluffy one.
Zero third-party data sharing.
On-device privacy controls.

"I just want her to use her imagination instead of staring at a screen all day. This is the first tech I actually feel good about."

– Intentional Parent

"He talks to his stuffed animals for hours. Having one that actually talks back—safely—has completely transformed our afternoons."

– Multilingual Household

"Bedtime used to be a 45-minute war zone. Now, she just tucks in with Zack and they whisper stories until she falls asleep."

– Relieved Mother

The Capsule Collection

A character your child chooses and bonds with. Designed to look beautiful in your home, and built to survive the playground.
