

ZackAI

Screen-Free Playtime Companion

For intentional parents who want their children to learn, play, and grow through conversation rather than screens.

Childhood Deserves a Companion, Not a Screen

Parents are exhausted by the daily **screen-time negotiation**. They want multilingual learning and **emotional development**, but existing solutions force an unfair compromise.

“If I hear ‘can I watch something’ one more time, I might lose it.
— The Intentional Parent

2/3 of parents are actively restricting screens.

The Frustration Scale

Safe but
Passive

Tonies & Yoto
(One-directional audio;
the child listens but
cannot talk back, leading
to eventual boredom)

The Missing
Category:
**Safe, interactive,
screen-free play**

Interactive but
Unsafe/Addictive

Tablets & Alexa
(Screen addiction, data
harvesting, Big Tech
privacy nightmares)

Meet ZackAI. Soft Intelligence for Growing Minds.

ZackAI blends the comfort of a plush companion with conversational AI and an animated LED personality. It is the friend every curious child deserves.

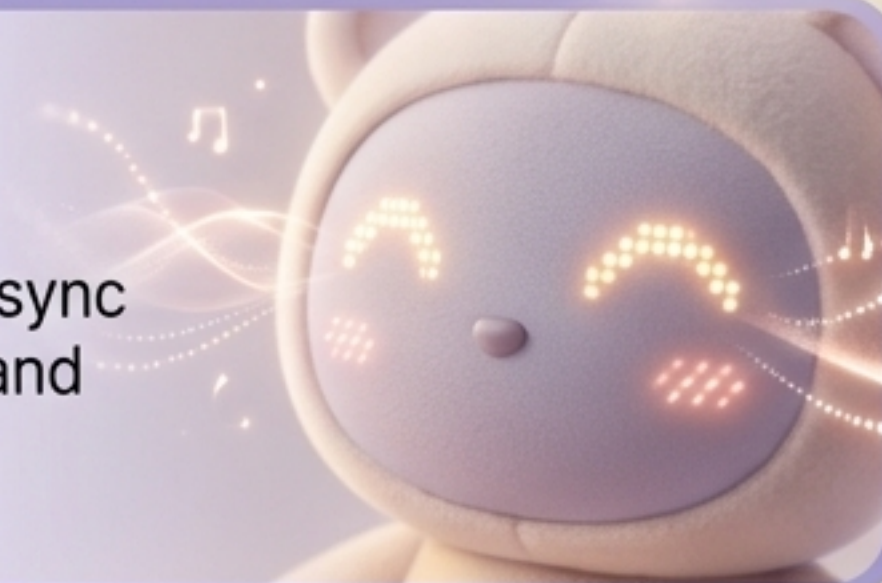

40+ Languages

Real-time conversational language learning with native-quality pronunciation.

Zero Screens

Expressive LED eyes sync with voice, emotion, and mood without pixels.

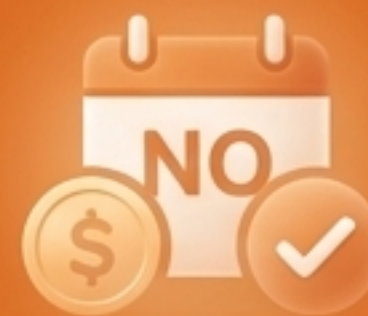

Persistent Memory

Builds a private memory of your child's interests and evolves alongside them.

No Subscription Ever

EUR 99 full launch price, no hidden fees.

Designing for the Intentional Parent

Educated, 30-42, urban France. Deliberate about screen time, values multilingualism, and researches extensively before purchasing.

Aspirations

Raise a curious, empathetic, multilingual child. Find a single **trusted companion** that grows with them across years.

Fears

AI profiling, passive consumerism, and **losing heritage languages** because immersion isn't enough.

Buying Triggers

Strict GDPR compliance, **native French/multilingual support**, a single flat price, and a **no-screen guarantee**.

The Anatomy of a Playtime Companion

Designed for ages 3-12, ZackAI combines premium tactile materials with child-safe European engineering (EN71, ASTM F963, and CE certified).

Expressive LED Eyes:

Animated blue eyes convey joy, curiosity, and sleepiness. Inter and JetBrains Mono.

1

Hypoallergenic Fur:

Tactile, fluffy, brushed cotton feel that is completely washable.

2

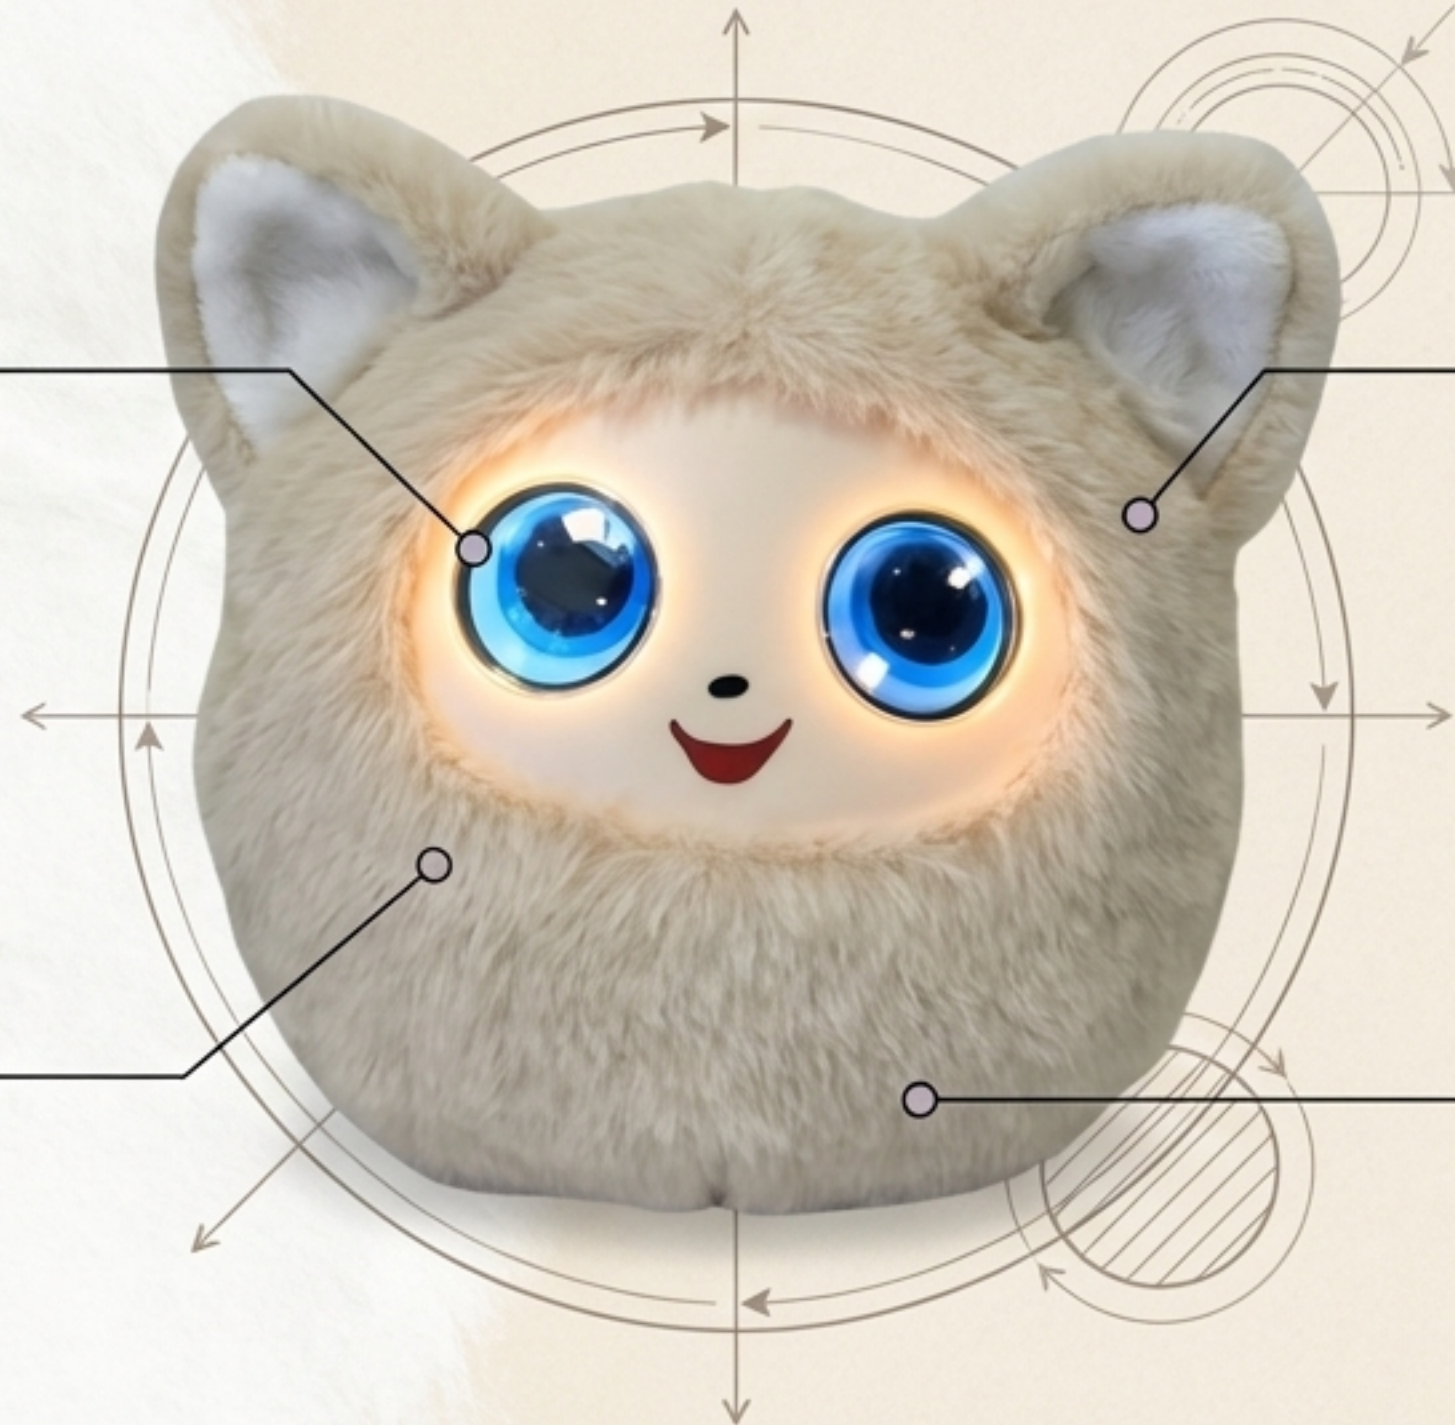

Acoustic Core: Hidden speaker array delivering clear, native-quality pronunciation.

3

USB-C Charging:

Hidden seamlessly within the plush body.

4

The \$1.37B AI Toy Market is Missing a Safe European Leader

No competitor successfully bridges **Montessori philosophy with AI technology**.
ZackAI exploits this gap with a **superior, privacy-first European moat**.

	Conversational AI	Screen-Free	40+ Languages	No Subscription	Privacy-First (GDPR/CE)

One Price. Infinite Conversations.

We reject the subscription trap. Our EUR 99 launch price builds immediate trust, while the emotional bond drives lifelong brand loyalty and multi-unit sibling purchases.

EUR 99. Every Feature. Forever.

First Year Cost of Ownership

Building the First Generation of Screen-Free AI Families

Launching strategically in France—a market with a strong cultural emphasis on education, strict screen-time laws (Loi Studer 2024), and rigorous GDPR awareness.

Phase 1

Kickstarter Launch
(Validation, Community, **50% Early Bird** funding).

Phase 2

 **France Retail & DTC**
(Establishing the Sans Écran standard).

Phase 3

Expat & EU Expansion
(Leveraging the 40+ language conversational capability).

Phase 4

Expanded Capsule Collections
(New colors and seasonal limited editions driving multi-unit collectability).

A Brand Built on Trust and Warmth

ZackAI looks like a Ghibli character, functions like a language tutor, and is branded with the understated elegance of European design.

Voice Rules

Use: companion,
safe, imagination.

Never use: gamify,
addictive, or user.

Bring Soft Intelligence Home

The smartest thing in the room is also the softest.
Join us in giving children a brilliant, patient, multilingual best friend.
